

RUSLAN KANATBEK - Senior SDET

Fremont, CA | (347) 654-6114 | ruslankanat.b@gmail.com | <https://www.ruslankanatbek.com/>

TECHNICAL SKILLS

- **Languages:** Python | Java | SQL | Ruby | TypeScript | Scala.
- **AI & Innovation:** GitHub Copilot (Custom Rule Sets) | Claude Code | MCP (Model Context Protocol) Server Engineering | Orchestration | Cost optimization.
- **Automation:** Selenium | Playwright | Appium | Pytest | TestNG | Cypress | Cucumber (BDD) | Behave.
- **Cloud & DevOps:** AWS (Lambda | DynamoDB | AppSync) | GitHub Actions | Firebase | Jenkins | Docker | Terraform | Bazel.
- **API & Backend:** GraphQL | REST API | Postman | Insomnia | PostgreSQL | Swagger.
- **Tools & Observability:** Datadog | Splunk | SonarQube | Sauce Labs | JIRA | TestRail | Zephyr.

PROFESSIONAL SUMMARY

Senior SDET and Quality Architect with 9+ years of experience specializing in high-scale automation frameworks and AI-assisted testing. Expert in building resilient CI/CD pipelines for Fintech and HealthTech. Proven track record of reducing release cycles by integrating AI/LLM agents into the QA lifecycle and driving a 70%+ increase in automation coverage.

EDUCATION

Specialist Degree in Electrical Engineering - 2012

PROFESSIONAL EXPERIENCE

Resmed (Medical SaaS) | Senior SDET (AWS/Mobile/Web) | Aug 2022 – Present

- **Architected and led** the end-to-end quality strategy for a **core product team** within the myAir app ecosystem (16M+ users); contributed to an 80% reduction in production defects for my domain through early-stage integration testing.
- Led mobile automation efforts for Android with **Kotlin/Espresso** and iOS with **Swift/XCuiTest**, building fully automated end-to-end test flows for the mobile app ecosystem.
- **Drove adoption of a new web automation stack (TypeScript/Cypress)**, successfully migrating the entire test suite from the outdated Protractor framework
- **Engineer a scalable Python/Behave backend framework** using AWS Lambda and AppSync, driving a **7x increase in test coverage** for complex GraphQL microservices.
- **Pioneer AI-augmented Engineering** via custom GitHub Copilot rules and a local **MCP assistant server**, tripling automation velocity and accelerating QA cycles by 30%.
- **Established proactive observability** using **Datadog**, implementing automated alerting that caught latency regressions before customer impact.
- **Manage and mentor** a team of 3 QA Engineers, standardizing "Shift-Left" design patterns across the organization.

Gemini (Crypto Exchange) | SDET / Software Engineer | Sep 2021 – Jul 2022

- **Architected a high-concurrency Python/Pytest framework** for trading modules, boosting automated coverage from 0% to 80% for critical financial features.
- **Optimized backend efficiency** by revamping Selenium suites, reducing redundant execution by 30% and enhancing **PostgreSQL** data validation.
- **Engineered core Scala backend components** for institutional trading, ensuring high-availability system performance and bridging the gap between QA and Engineering.
- **Transformed quality standards** by training 7 Software Developers on modern QA methodologies and shared ownership of code quality.

TCS (Client: Google) | QA Tester (Mobile) | Feb 2021 – Sep 2021

- **Spearheaded mobile quality initiatives** for **Google Shopping** on Android and iOS, implementing automated smoke and regression suites that significantly increased release reliability.
- **Served as GWS (Google Workspace) Test Lead** during high-visibility product launches, managing on-call duties to ensure rapid detection and 24/7 resolution of critical blockers.
- **Engineered advanced functional and visual automation** using **Java, Appium, and Bazel**, improving defect visibility and UI consistency across diverse mobile device profiles.
- **Automated complex internal workflows** for Google Workspace (Sheets, Docs, Gmail), reducing manual test cycle times and streamlining cross-team QA processes.

Veridian IT Staffing | QA Automation Engineer (Consultant)

- **Client: Citibank | Aug 2019 – Jul 2020**
 - Developed a full-stack automation framework from scratch using **Java, Selenium, and REST-assured**, driving higher defect detection rates for critical banking modules.
 - Implemented **BDD workflows with Cucumber** to map JIRA acceptance criteria to executable tests, ensuring 100% requirement traceability.
 - Directed comprehensive API and integration testing for mission-critical financial services, maintaining system integrity ahead of major deployments.
- **Client: Cisco | Oct 2017 – Jul 2019**
 - Scaled a **Selenium/JUnit framework** integrated with **Jenkins**, facilitating daily automated regression runs that achieved **90% test coverage**.
 - Enhanced CI/CD workflows by integrating automated regression results directly into **Jenkins** dashboards, enabling real-time visibility into build health and cross-functional collaboration.
 - Enforced backend reliability through automated API validation using **Swagger** and rigorous **SQL-based** data integrity checks.
- **Client: Health First | Sep 2015 – Aug 2017**
 - Designed end-to-end testing strategies for **HIPAA-compliant** web and backend features, ensuring 100% requirements coverage.
 - Drove product usability by conducting exploratory testing to identify edge cases, improving the user experience for patients and providers.
 - Facilitated data-driven testing by managing **SQL verification scripts** to ensure high accuracy in backend validation.
